

WIND PROJECTS

TRUST WHISSELL FOR YOUR NEXT...

WIND PROJECT

Trust the specialists on Whissell's team for your next windmill project for both civil and hauling. Our experts in project management, construction practices, and risk management will complete your project on time and on budget.

Why work with Whissell?

EXPERTISE

We have a team of earthworks experts with the background and experience with windmill projects for roads, pads and excavation. We also have the logistics team for heavy hauls, haul equipment, windmills, parts and windmill blades and components.

SAVINGS

We optimize costs by looking for efficiencies on every job. We'll coordinate between our Civil Division and Transportation Division so that the roads are done right for your expensive cargo.

EQUIPMENT

We have a large fleet of equipment for any project and tools that can pinpoint accuracy and eliminate risk. Our Haul equipment is top notch and ready for every project!

LOCATION

We have a Southern Alberta location in Lethbridge so your needs are taken care of and your supporting the local economy by using our services!

Our windmill construction expertise includes:

- Site grading
- Road building and culvert installation
- Overburden stripping, embankment excavation
- Restoration & rehabilitation
- Pad construction
- Trenching
- Road maintenance
- And more

Let us help with your next wind project!
